

Caulfield Transport – Here and Open for Business

Caulfield Transport's recent move to their new premises in Baldonnell has come at a "challenging time", said Fintan Caulfield, Managing Director. "While we could have stayed for another few years in our old building, we felt the time was right to commit to this new premises. The 3.5-acre standalone site gives us a 50,000 sq ft warehouse with an impressive 10 dock levellers. This, compared with our previous 30,000 sq ft and one dock leveller, says it all.

Having successfully completed the move to Dublin and our 2 year plan in 2013, In March this year we put in place a 10 year plan for the new premises. We had to spend a lot of time and money getting the facility to the standard we wanted, but we achieved that by midyear. The 50,000 sq ft warehouse will be ample to accommodate our needs for the next 10 years. The past couple of months have seen a drop in our business in line with industry figures, but we are always looking for new opportunities and new efficiencies – as you must in these changing times.

"We successfully re-tendered for two of our existing customers and also have won some new business. We have increased our long-standing 15-year business with Nightline, for whom we do overnight runs from Cork and Kerry and to Waterford.

"We have also invested heavily in a new vehicle tracking system that

accurately monitors each vehicle and its driving efficiency, i.e. over-revving, unnecessary idling, and with the co-operation of our drivers we are striving to reduce our emissions therefore leading to a cleaner environment.

"We have also invested heavily in new stock, adding nine new trucks this year and have planned to make further investments next year.

Caulfield Transport are dedicated to the Domestic Appliance Industry, all our vehicles are specifically designed for the carriage and storage of White/Brown goods. All our vehicles are fitted with Tail Lifts and with Satellite Tracking Systems. All home deliveries are sent a text message the evening prior to delivery and we provide a digital image next day of proof of delivery.

Clamps are used for the loading and unloading of all vehicles. We also provide a pick and pack service with our own stock control system."

Combined Fleet

"In our combined operations we now have 52 staff, 38 vehicles and almost 90,000 sq ft with 18 bays. Both our Cork and Dublin premises have state-of-the art CCTV .

The Dublin warehouse is minutes from the M50 and the Cork warehouse is minutes from the Jack Lynch tunnel.

Caulfield Customers

Caulfield Transport Ltd takes this opportunity to say "Thank You" to its customers in the electrical industry:

BSH Siemens
